

Mohamed Ibrahim S

Software Developer (.Net) | [Linkedin](#) | [Portfolio](#) | [Github](#) | [Mail](#) | (971-569522895) | Immediate Joiner

PROFESSIONAL SUMMARY

Software Developer with **3+ years of professional experience** in developing, enhancing, and maintaining web-based applications and information systems using **C#, .NET Core, ASP.NET Core, ASP.NET MVC, and Web API**. Experienced in **RESTful API development, system integration, database design and management, SQL Server, PostgreSQL, Entity Framework Core, and Git**. Strong background in troubleshooting technical issues, implementing system enhancements, debugging, testing, and developing reliable and maintainable software solutions. Experienced working with **APIs, microservices, database-driven applications, authentication, and third-party/system integrations**, with a strong understanding of software development practices and clean coding principles. Familiar with technical documentation, deployment processes, performance optimization, and automated testing. Strong problem-solving and collaboration skills with the ability to understand business requirements and translate them into practical technical solutions. **Available to join immediately and open to opportunities in UAE.**

EDUCATION

Jamal Mohamed College | Bharathidasan University

Bachelor's of Science in Computer Science

- **CGPA: 7/10, B+ Grade**

Tiruchirappalli, India

Expected Graduation 2021

EXPERIENCE

Triton Tech Labs Pvt Ltd

Tenkasi, India

Digital Solution Engineer

Aug 2022 – Aug 2025

- Designed, developed, and maintained **scalable backend services and RESTful APIs** using C# and ASP.NET Core, focusing on performance, reliability, and maintainability.
- **Built and maintained high-performance Web APIs** support enterprise integrations and high-volume requests, with a strong focus on **understanding service scalability and complexity**.
- Developed and maintained **Microservice APIs** to provide reliable and consistent data across multiple consuming applications.
- Integrated **PostgreSQL, SQL Server, and Neo4j** with complex data models to support hierarchical data, reporting, and analytics.
- Implemented **caching mechanisms** to improve API response performance and provide efficient real-time data access.
- Automated the Nippon Paint dealer and pin code mapping process, reducing processing time from approximately **30 minutes to 5–10 minutes**, depending on file size.
- Implemented validation and synchronization mechanisms to maintain **data consistency and integrity** across user and dealer hierarchies.
- Troubleshoot and resolved **production issues and critical application bugs**, contributing to system reliability and performance improvements.
- Participated in **architectural discussions, sprint planning, and code reviews**, collaborating with cross-functional teams to deliver business requirements.
- Contributed to **CI/CD deployments** and application delivery improvements, including zero-downtime deployment practices.

PROJECTS

Client: Nippon Paints Pvt Ltd, India

- Developed and maintained **backend services and RESTful APIs** supporting technology and labour workflows for home painting services.
- Built **end-to-end hierarchy and data-mapping automation** for Nippon Paint leads, handling complex user and dealer relationships.
- Implemented validation and mapping controls to maintain **data accuracy and consistency** in production environments.
- Troubleshoot and resolved **critical production issues and application bugs**, ensuring reliable system operation.
- Collaborated with development teams to implement enhancements, maintain existing functionality, and support business requirements.

- Designed and maintained a **data hierarchy platform** supporting user, dealer, and pincode management across **10+ live Nippon business applications**.
- Developed asynchronous application workflows to support efficient real-time management of hierarchical business data.
- Implemented both **file-based and UI-driven automation** for data mapping and complete data lifecycle operations, including insert, upsert, and removal.
- Engineered and maintained **Microservice APIs** for reliable data delivery between Aikyam and multiple consuming applications.
- Implemented **caching mechanisms** to optimize API performance and enable efficient real-time data access.
- Maintained **system-wide data consistency** across multiple consuming applications and complex hierarchical relationships.
- Implemented comprehensive **audit trails** to track data creation, modification, movement, and removal for improved data governance and traceability.

TECHNICAL SKILLS

Programming:	C#, LINQ, Cypher Query Language
Backend & Frameworks:	.NET, .NET Core, ASP.NET Core, ASP.NET Core Web API, MVC, Entity Framework Core, Microservices, CQRS
APIs & Architecture:	RESTful APIs, REST Web Services, Microservices Architecture, API Integration, Distributed Backend Services
Databases:	SQL Server, PostgreSQL, Neo4j, Redis
Testing & Development Practices:	TDD, Automated Testing, Clean Code, Code Reviews, Agile/Scrum
DevOps & Cloud:	GitHub, Azure DevOps, CI/CD, Familiar in IIS Deployment
Backend Tools:	Apache NiFi, Hangfire, Caching
Frontend:	Familiar HTML, CSS, and JavaScript, jQuery, Bootstrap

CORE STRENGTHS

Problem Solving • Analytical Thinking • Debugging & Troubleshooting • Cross-functional Collaboration • Communication • Agile/Scrum • Continuous Learning

ADDITIONAL INFORMATION

Nationality:	Indian
Visa Status:	Visit Visa
Marital Status:	Single
Languages:	Fluent (English, Tamil, Malayalam)
